# Press Release

## Computech, Inc. Names Lawrence (Larry) Fitzpatrick as President

Bethesda, MD *Monday June 29, 2009* Today, Computech announced that it has named Lawrence Fitzpatrick to serve as the company's President. Since 2002, Fitzpatrick has served as Senior Vice President of the Financial Industry Regulatory Authority ("FINRA"), where he has been responsible for the organization's information technology applications and system architecture. Prior to his current responsibilities at FINRA, Fitzpatrick was Technology Vice President at Open Text Software (OTEX) and Chief Technology Officer at Personal Library Software.

J.D. Murphy, Jr., Computech's CEO mentioned that Fitzpatrick's exceptional experience leading teams and his standing within the technology community are indispensable to Computech's future growth. "Larry's unparalleled experience in the industry coupled with his strong execution skills, uniquely qualify him to lead Computech," said Murphy. "Over the 20 years that I have known Larry, I always have been impressed by his professionalism and personal integrity. I am certain that Larry will continue to expand Computech's reach, while ensuring its continued commitment to customer satisfaction and excellence." Murphy will continue to be actively involved in the company as its CEO.

Fitzpatrick commented that Computech's leadership in the regional technology community, its proud history of innovation, and its remarkably talented staff members and their singular commitment to excellence are the reasons he accepted the leadership role. Further, he explained it is an exciting opportunity to build on Computech's 30 years of success by expanding the firm's client base.

For Immediate Release

A brief biography of Fitzpatrick is included below:

As Senior Vice President at FINRA, Mr. Fitzpatrick led software development and architecture. His teams delivered numerous key systems, created the architecture group, and built a centralized application development organization of 500 people. Until 1999, Mr. Fitzpatrick delivered commercial software products as Technology Vice President at Open Text Software (OTEX), and as Chief Technology Officer at Personal Library Software. He has specialized in high performance computing and database systems and delivered industry-leading commercial software that is widely used. Mr. Fitzpatrick has a Master's in Biomedical Engineering (Informatics) from The University of Virginia, and Bachelor of Science in Biology and minor in Computer Science from Georgetown University.

About Computech: Since 1979, Computech has been solving clients' information technology challenges through collaborative problem solving and customer partnerships. Computech's experience encompasses the full gamut of software support services—from rapid application design and deployment to system repair and refinement. From its first contract with the Department of Energy more than 30 years ago, Computech has grown and earned an enviable reputation for providing quality support and innovative ideas. Be it the U.S. government's first automated auction system or the import system that accounts for over \$1 trillion worth of goods imported into the U.S. on an annual basis, Computech's accomplishments are impressive as they are compelling.
